

AUTOTROL 363 VALVE

AUTOMATIC FILTER VALVE

COMPACT, LOW-PROFILE SOLUTION FOR A BROAD RANGE OF FILTRATION APPLICATIONS

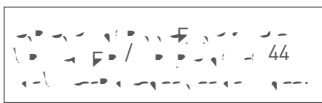

FEATURES / BENEFITS

- Compact, low-profile design for easy installation in tight spaces.
- Automatic backwashing and filtration cycle.
- 3" NPT inlet and outlet ports.
- 21" high profile for easy access.
- 1" NPT drain port.
- 3" NPT filter housing connection.

OPTIONAL

- 604-... 5"-1.25"

ELECTRICAL

1. All wiring shall be in accordance with the National Electrical Code (NEC) and local codes.

ANFOMETERION

1. The system shall be designed to handle a maximum flow rate of 120/230 GPM.

2. The system shall be designed to handle a maximum flow rate of 120 GPM.

3. The system shall be designed to handle a maximum flow rate of 100 GPM.

4. The system shall be designed to handle a maximum flow rate of 240 GPM.

5. The system shall be designed to handle a maximum flow rate of 240 GPM.

6. The system shall be designed to handle a maximum flow rate of 240 GPM.

7. The system shall be designed to handle a maximum flow rate of 240 GPM.

AL E SPECIFICATION

1. The system shall be designed to handle a maximum flow rate of 120/230 GPM.

2. The system shall be designed to handle a maximum flow rate of 120 GPM.

3. The system shall be designed to handle a maximum flow rate of 100 GPM.

4. The system shall be designed to handle a maximum flow rate of 240 GPM.

5. The system shall be designed to handle a maximum flow rate of 240 GPM.

6. The system shall be designed to handle a maximum flow rate of 240 GPM.

7. The system shall be designed to handle a maximum flow rate of 240 GPM.

PERFORMANCE

1. The system shall be designed to handle a maximum flow rate of 120/230 GPM.

2. The system shall be designed to handle a maximum flow rate of 120 GPM.

3. The system shall be designed to handle a maximum flow rate of 100 GPM.

4. The system shall be designed to handle a maximum flow rate of 240 GPM.

5. The system shall be designed to handle a maximum flow rate of 240 GPM.

6. The system shall be designed to handle a maximum flow rate of 240 GPM.

7. The system shall be designed to handle a maximum flow rate of 240 GPM.

AL E CONNECTION

1. The system shall be designed to handle a maximum flow rate of 120/230 GPM.

2. The system shall be designed to handle a maximum flow rate of 120 GPM.

3. The system shall be designed to handle a maximum flow rate of 100 GPM.

4. The system shall be designed to handle a maximum flow rate of 240 GPM.

5. The system shall be designed to handle a maximum flow rate of 240 GPM.

6. The system shall be designed to handle a maximum flow rate of 240 GPM.

7. The system shall be designed to handle a maximum flow rate of 240 GPM.

DIMENSION

1. The system shall be designed to handle a maximum flow rate of 120/230 GPM.

2. The system shall be designed to handle a maximum flow rate of 120 GPM.

3. The system shall be designed to handle a maximum flow rate of 100 GPM.

4. The system shall be designed to handle a maximum flow rate of 240 GPM.

5. The system shall be designed to handle a maximum flow rate of 240 GPM.

6. The system shall be designed to handle a maximum flow rate of 240 GPM.

7. The system shall be designed to handle a maximum flow rate of 240 GPM.

FILTRATION & CO

1. The system shall be designed to handle a maximum flow rate of 120/230 GPM.

2. The system shall be designed to handle a maximum flow rate of 120 GPM.

3. The system shall be designed to handle a maximum flow rate of 100 GPM.

4. The system shall be designed to handle a maximum flow rate of 240 GPM.

5. The system shall be designed to handle a maximum flow rate of 240 GPM.

6. The system shall be designed to handle a maximum flow rate of 240 GPM.

7. The system shall be designed to handle a maximum flow rate of 240 GPM.
